

## 1100UST (1000MT) ALLUMINIUM EXTUSION PRESS

The Hydraulic system adopts components from Germany, Japan, Taiwan and plug-in logic control circuit. The advanced manufacturing process of hydraulic block from Japan and Taiwan is introduced, integrated with reality. All of them make the hydraulic system high pressure resistance, low noise, low noise, low noise, low all temperature and big flow, so as to let the operation response of complete machine fast and reality achieve low consumption and high operation response of complete machine fast and reality achieve low consumption and high efficiency.
